

COVID VACCINES ADDENDUM

These vaccines have not been through the thorough testing, which takes 5-10 years. Thus side effects on individuals who get the vaccine, and those who are exposed second-hand to the vaccine have not been tested, researched, or analyzed.

Kishami Academy LLC has immunocompromised students and parents who rely on being informed of the vaccination activities of others. Some of these students and parents have acquired diseases, and mental/physical regressions due to being in contact with freshly vaccinated people.

PLEASE NOTE

If you get the vaccine please adhere to this Stay-Away request to protect our students and families:

Pfizer-Biontech: *7 days after second dose of vaccine*

Moderna: *7 days after second dose of vaccine*

Astrazeneca: *Unknown request because ingredients have not been released*

Jenssen: *14 days after vaccination*

VACCINE INFORMATION

THE PFIZER-BIONTECH COVID-19 VACCINE

The Pfizer-BioNTech COVID-19 Vaccine is an unapproved vaccine that may prevent COVID-19. There is no FDA-approved vaccine to prevent COVID-19.

INGREDIENTS: The Pfizer-BioNTech COVID-19 Vaccine includes the following ingredients: mRNA, lipids ((4-hydroxybutyl)azanediyl)bis(hexane-6,1-diyl)bis(2-hexyldecanoate), 2 [(polyethylene glycol)-2000]-N,N-ditetradecylacetamide, 1,2-Distearoyl-sn-glycero-3-phosphocholine, and cholesterol), potassium chloride, monobasic potassium phosphate, sodium chloride, dibasic sodium phosphate dihydrate, and sucrose.

THE MODERNA COVID-19 VACCINE

The Moderna COVID-19 Vaccine is a vaccine and may prevent you from getting COVID-19. There is no U.S. Food and Drug Administration (FDA) approved vaccine to prevent COVID-19.

INGREDIENTS: The Moderna COVID-19 Vaccine contains the following ingredients: messenger ribonucleic acid (mRNA), lipids (SM-102, polyethylene glycol [PEG] 2000 dimyristoyl glycerol [DMG], cholesterol, and 1,2-distearoyl-sn-glycero-3-phosphocholine [DSPC]), tromethamine, tromethamine hydrochloride, acetic acid, sodium acetate trihydrate, and sucrose.

****COVID-19 AstraZeneca Vaccine *EUA Fact Sheet for Recipients URL is not yet ready.*** As of May 20, 2021

THE JANSSEN COVID-19 VACCINE

The Janssen COVID-19 Vaccine is an unapproved vaccine that may prevent COVID-19. There is no FDA-approved vaccine to prevent COVID-19.

INGREDIENTS: The Janssen COVID-19 Vaccine includes the following ingredients:

recombinant, replication-incompetent adenovirus type 26 expressing the SARS-CoV-2 spike protein, citric acid monohydrate, trisodium citrate dihydrate, ethanol, 2-hydroxypropyl- β -cyclodextrin (HBCD), polysorbate-80, sodium chloride.

WHAT IS AN EMERGENCY USE AUTHORIZATION (EUA)?

The United States FDA has made the COVID-19 Vaccine available under an emergency access mechanism called an EUA. The EUA is supported by a Secretary of Health and Human Services (HHS) declaration that circumstances exist to justify the emergency use of drugs and biological products during the COVID-19 pandemic. The COVID-19 Vaccine has not undergone the same type of review as an FDA-approved or cleared product. FDA may issue an EUA when certain criteria are met, which includes that there are no adequate, approved, available alternatives. In addition, the FDA decision is based on the totality of scientific evidence available showing that the product may be effective to prevent COVID-19 during the COVID-19 pandemic and that the known and potential benefits of the product outweigh the known and potential risks of the product. All of these criteria must be met to allow for the product to be used in the treatment of patients during the COVID-19 pandemic.
